COMPANY PROFILE

NOVA FLEXIPACK PVT. LTD. incorporated in September 1995, is a resilient and dynamic organization catering to plastic flexible packaging needs.

The head office in **Mumbai** and the manufacturing unit at **Daman**, have proven to be beneficial to our clients in the North and South of India due to **ease in transport logistics**.

Nova Flexipack is a privately held limited company having total staff strength of 60 personnel

specialized in the manufacturing of multilayer co-extruded blown polyethylene film of LDPE – LLDPE – HDPE - Metallocene for general converting applications or direct product packaging applications with an R&D unit to reach all specialized needs.

Nova Flexipack polyethylene films are designed to deliver niche packaging benefits based on the specific requirements of the applications.

VALUES THAT DRIVE US

CUSTOMER FIRST APPROACH

CUSTOMISABLE PACKAGING FILM

QUALITY CONTROL

- Dedicated Quality Control Lab
- Independent Quality Control Squad to maintain high levels of quality consistency.
- ISO Certified testing protocols with multi-modality testing machines.

OUR PRODUCT FEATURES

Our specialty barrier films are designed in such a way to protect food and other products from environmental, chemical, and physical mishandling.

The film structure has barrier properties necessary to prevent permeability of Oxygen, Carbon dioxide and Nitrogen penetrating packaging.

Nova Flexipack's specialty barrier films are meticulously designed to safeguard food and other products from environmental factors, chemicals, and physical mishandling, ensuring optimal protection and preservation.

PRODUCT MIX

SHRINK FILM

Shrink wrap is a polymer plastic film that tightly shrinks when heat is applied, commonly used as an over wrap for packaging including cartons, boxes, cans, and pallet loads to stabilize, unitize, protect, and add tamper resistance. It is also used for covering boats during manufacture and winter storage.

STRETCH FILM

Stretch wrap or stretch film is a highly stretchable plastic film that is wrapped around items. The elastic recovery keeps the items tightly bound. It is frequently used to unitize pallet loads but also used for bundling smaller items. Types of stretch film include Hand Stretch Film and Machine Stretch Film.

MULCH FILM

Mulch film is a thin plastic film used in agriculture and gardening to cover the soil around plants, helping to retain moisture, suppress weeds, regulate temperature, and promote plant growth.

PHARMACEUTICAL LAMINATION FILM

Speciality films well suited for Lamination with BOPP, PET, Aluminum foil and paper. Lamination of flexitubing for toothpaste, cosmetics and pharmaceutical, etc.

FMCG FILM

High dart impact and tear resistant film for all household and life care products including but not limited to detergent powder, shampoo, toothpaste, liners, carry bags etc.

FOOD PACKING FILM

Our bare films with multi-colour surface printing in roll forms bags or pouches are used for different end applications like Packaging of Milk, Oil, Ghee, Snack food, Bread, Pastries, Fruit, Detergent, Lube Oil, Bag in box, bag in carton, bag in tin concept, Vacuums inert gas packaging, Hygroscopic products in strip Packaging, etc.

SPECIAL PURPOSE FILM (AVIATION, CIVIL CONSTRUCTION ETC.)

Require a custom Job ? Specialized films are high-performance materials used in various industries such as aviation, civil construction, and others for applications like aircraft coatings, structural reinforcements, moisture barriers, insulation, and more, providing unique properties tailored to specific industry requirements.
